COURSE CONTENT

Course Coordinator : Hyo Jung Lee
Course Code / Title : HS2028 Graying Society: Issues and Challenges
Pre-requisites : HS1001 Person and Society
No. of AUs. : 3
Contact Hours : 39 hours

Course Aims

This course provides a comprehensive overview of the field of social gerontology, with an emphasis on its interdisciplinary nature, links to such fields as sociology, psychology, public policy, health/medicine, and others. This course introduces social theories on aging and methodologies in aging research. The demographic, social, and economic trends in graying societies will be discussed. In addition, we will examine physical, psychological, and social processes of aging. Readings, lectures, discussions, and other class assignments and activities are designed to help you understand that aging is socially constructed and individual lives are influenced by social forces as they grow older. We will learn to appreciate how aging can be both meaningful and meaningless, and how a long life can be both desired and undesired. Considerations will be given to ethical issues and dilemmas and to social policy implications.

Intended Learning Outcomes (ILO)

By the end of this course, you would be able to:
1. Describe the causes of population aging and current and future trends in graying societies.
2. Discuss the impact of the aging population on individual, family, and society.
3. Describe and apply basic terms, concepts, and theories on aging.
4. Demonstrate knowledge of physical, psychological, and social processes of aging.
5. Counter the myths and ignorance surrounding older adults and aging process in society.
6. Demonstrate critical thinking and inquiry skills through assignments and discussions.

Course Content
